

Re-RAP
RAP REJUVENATING ADDITIVE

Re-RAP 9

Product:

RE-RAP 9 is a 100% active liquid additive that helps rejuvenate RAP and improves compactability.

Benefits:

- Aids in using higher percentages of RAP in asphalt mixes.
- Costs less than using a softer asphalt.
- Eliminates the need to store and manage more than one asphalt.
- Easily pumped in using an existing additive system.
- Aids in the compaction of hot mix asphalt (including acid modified asphalt).

Recommended: Dosage

1.00% based upon the weight of the liquid asphalt cement.
(a higher dosage may be required when using 50 to 100% RAP).

Properties:

Viscosity @ 77°F cs	100- 200
Specific Gravity @ 77°F	0.90 ± 0.04
Weight, lbs/gal @ 77°F	7.50 ± 0.33
Flash Point (ASTM D92)	>321°F
Pour Point (ASTM D97)	0°C/32°F

Storage and Handling

Always refer to the product MSDS prior to handling. RE-RAP 9 can be stored in a mild steel tank. The recommended storage temperature is 100° to 120° F. Packaging includes 55 gallon drums (430 pounds net), 275 gallon totes (2,205 pounds net) or in various bulk quantities.
